In a society steeped in tradition, Princess Lia's life follows a preordained course. As First Daughter, she is expected to have the revered gift of sight—but she doesn't—and she knows her parents are perpetrating a sham when they arrange her marriage to secure an alliance with a neighboring kingdom—to a prince she has never met. On the morning of her wedding, Lia flees to a distant village. She settles into a new life, hopeful when two mysterious and handsome strangers arrive—and unaware that one is the jilted prince and the other an assassin sent to kill her. Deception abounds, and Lia finds herself on the brink of unlocking perilous secrets—even

as she finds herself falling in love. The Kiss of Deception is the first book in Mary E. Pearson's Remnant Chronicles.

**Pearson's Comprehensive Medical Assisting, Third Edition**, provides students with the right procedural, people, and professional skills needed to succeed in the medical assisting profession. Teaching and Learning Experience Offers a step-by-step, competency-based approach that covers virtually all facets of the medical assisting profession:

- Procedural Skills**—Speaks directly to the medical assisting student, presenting all the procedures and tasks that are relevant to the medical assistant role.
- People Skills**—Covers people and communication skills that are essential to being a

successful medical assistant. Professional Skills—Instills concepts and critical thinking skills needed to succeed as a medical assistant professional. Is the Bible really true? How can I prove it? This book is especially helpful for newer Christians just coming to grips with the implications of the gospel in all areas of their lives. What do you say when someone at work asks you why the gospel stories differ? How do you answer your neighbor when she asks what you think about all those "errors" in the Bible? Glenn Pearson offers simple, accessible principles that provide any Christian with the tools he or she needs to confidently respond to skeptical inquiries. Blitzer continues to raise the bar with his engaging applications developed to motivate students from diverse majors and backgrounds. Thinking Mathematically, Fifth Edition, draws from the author's unique background in art, psychology, and math to present math in the context of real-world applications. Students in this course are not math

majors, and they may never take a subsequent math course, so they are often nervous about taking the class. Blitzer understands those students' needs and provides helpful tools in every chapter to help them master the material. Voice balloons appear right when students need them, showing what an instructor would say when leading a student through the problem. Study tips, chapter review grids, Chapter Tests, and abundant exercises provide ample review and practice. The Fifth Edition's MyMathLab® course boasts more than 2,000 assignable exercises, plus a new question type for applications-driven questions that correlate to section openers in the textbook. Chapter Test Prep Videos show students how to work out solutions to the Chapter Tests; the videos are available on DVD, in MyMathLab, and on YouTube™. A stunning new young adult adventure set in the kingdoms of the Remnant, by the author of the New York Times-bestselling Remnant Chronicles and the Jenna Fox Chronicles. A formidable outlaw family that claims to be the first among

nations. A son destined to lead, thrust suddenly into power. Three fierce young women of the Rahtan, the queen's premier guard. A legendary street thief leading a mission, determined to prove herself. A dark secret that is a threat to the entire continent. When outlaw leader meets reformed thief, a cat-and-mouse game of false moves ensues, bringing them intimately together in a battle that may cost them their lives—and their hearts.

Social computing is concerned with the study of social behavior and social context based on computational systems. Behavioral modeling provides a representation of the social behavior, and allows for experimenting, scenario planning, and deep understanding of behavior, patterns, and potential outcomes. The pervasive use of computer and Internet technologies by humans in everyday life provides an unprecedented environment of various social activities that, due to the platforms under which they take place, generate large amounts of stored data as a by-product, often in systematically organized form. Social computing facilitates behavioral modeling in model building, analysis, pattern mining, and prediction. Numerous interdisciplinary and interdependent systems are created and used to represent the various social and physical systems for investigating

the interactions between groups, communities, or nation-states. This requires joint efforts to take advantage of the state-of-the-art research from multiple disciplines improving social computing and behavioral modeling in order to document lessons learned and develop novel theories, experiments, and methodologies to better explain the interaction between social (both informal and institutionalized), psychological, and physical mechanisms. The goal is to enable us to experiment, create, and recreate an operational environment with a better understanding of the contributions from each individual discipline, forging joint interdisciplinary efforts. This volume comprises the proceedings of the third international workshop on Social Computing, Behavioral Modeling and Prediction, which has grown tremendously. **Vow of Thieves is the thrilling sequel to Dance of Thieves, set in the same world as Mary E. Pearson's New York Times-bestselling Remnant Chronicles. Kazi and Jase have survived, stronger and more in love than ever. Their new life now lies before them—the Ballengers will be outlaws no longer, Tor's Watch will be a kingdom, and Kazi and Jase will meet all challenges side by side, together at last. But an ominous**

warning mars their journey back, and they soon find themselves captured in a tangled web of deceit woven by their greatest enemies and unlikeliest allies, a place where betrayals run deeper and more deadly than either had thought possible, and where timeless ambitions threaten to destroy them both. This maths scheme is written specifically for Scotland to help implement the recommendations from Improving Mathematics Education 5-14. It provides an increasing pace of progression; end of level assessment; oral and mental calculation; integral homework; and support for planning.
