Everyone in the Pee Wee Scouts wants to win a trip to Camp Blast Off, the super-cool summer camp where kids learn what it's like to be an astronaut. But there's only room for one scout from each troop in the country. So the Pee Wee Scouts set out to make the best project about the planets and the solar system: Roger is building model meteors and stars with light bulbs, Rachel is stirring up a recipe for freeze-dried peanut butter. Find out what Molly and Mary Beth are working on--maybe the most exciting project of all! 180,000 years have passed The Ark has returned with others from outside our galaxy. All the members of the conspiracy to save the Progeny and Furies are making bets on what they will find. Did the Progeny and Furies on the planets they seeded find the Box? If so, what did they do with it? Have any of them gone into space? Did any of them meet? If they did, what happened? What they do find are three things: surprises, galactic war, and eventually a journal entitled "Stories from the Tree". The journal does not answer all their questions, but for each of the seeded planets, including Research 4, there is a story recounting the events surrounding the finding of the Box. Reading through the papers he found in the barn, the author was surprised to discover how significant the finding of the Box was on some planets and how insignificant it was on others. In all cases, however, drama surrounded the finding of the Box. Each story, in addition, gave those on the Ark a snapshot of the culture that had arisen on each of the planets during their absence. It is up to Sackboy to defeat Vex and bring peace back to the world. The good news is that you don't need to 100% the game to earn the Platinum. You still need to collect most Dreamer's Orbs (275 to access all levels), but not all of them are needed to progress through the story, let alone 100%ing the game. Most trophies are instead tied to killing minions a certain way and to the multiplayer side of the game. Even though online co-op launches in late 2020, you can still earn the Platinum through local couch co-op or via online Shareplay (PS+

required for Shareplay method and both players must own the game). If you choose to use Shareplay, remember that the trophies will unlock only for the host, so if your friend wants to unlock the trophies as well, you'll have to do everything twice. Download Now! It's the main weapon in implementing our "No resident left behind!" policy. Beloved science commentator Bob McDonald takes us on a tour of our galaxy, unraveling the mysteries of the universe and helping us navigate our place among the stars. How big is our galaxy? Is there life on those distant planets? Are we really made of star dust? And where do stars even come from? In *An Earthling's Guide to Outer Space*, we finally have the answers to all those questions and more. With clarity, wisdom, and a great deal of enthusiasm, McDonald explores the curiosities of the big blue planet we call home as well as our galactic neighbours—from Martian caves to storm clouds on Jupiter to the nebulae at the far end of the universe. So if you're pondering how to become an astronaut, or what dark matter really is, or how an asteroid wiped out the dinosaurs, look no further. Through a captivating mix of stories, experiments, and illustrations, McDonald walks us through space exploration past and present, and reveals what we can look forward to in the future. *An Earthling's Guide to Outer Space* is sure to satisfy science readers of all ages, and to remind us earthbound terrestrials just how special our place in the universe truly is. For everyone who's curious about what's new under (and over and around) the stars. Douglas Adams famously pronounced in *The Hitchhiker's Guide to the Galaxy* that the answer to life, the universe, and everything was 42. *Quirks & Quarks*, whose approach to science owes almost as much to Adams as it does to Newton or Einstein or Hawking, have flipped that notion through a gap in the space-time continuum (or something like that) and come up with answers to the 42 essential questions about space. Much about the universe is very hard for most of us to grasp, and if anyone can explain these mind-bending aspects of the heavens above, it's the *Quirks & Quarks* producers, who have been bringing Canadians understandable science, with trademark humour, for more than thirty years. In their *Guide to Space*, they answer such pressing questions as Where does space begin? Why is most of the universe missing? Is there intelligent life in the universe? And the real puzzler: What came before the Big Bang? They also answer questions we wish we'd thought to ask, such as Can you surf a gravity wave? and Why is the universe's temperature on my TV? There are answers as well to far more practical questions, like What happens when you fall into a black hole? and How will the universe end? The answers, which have been vetted by a team of astronomers, are witty, authoritative, in-depth, accurate, up-to-date astronomically, and, of course, quirky. "These four volumes cover 791 books or series, 238 of them published during the 1980s and 1990s. the entries are 1,000 words long for single books and 1,500 for series, with a one-sentence summary beginning each entry followed by bibliographical information ... An engaging, accessible citizen's guide to the seven urgent changes that will really make a difference for our climate—and how we can hold our governments accountable for putting these plans into action. Dozens of kids in Montgomery County, Maryland, agitated until their school board committed to electric school buses. Mothers in Colorado turned up in front of an obscure state panel to fight for clean air. If you think the only thing you can do to combat climate change is to install a smart thermostat or cook plant-based burgers, you're thinking too small. That's where The Big Fix comes in, offering everyday citizens a guide to the seven essential changes our communities must enact to bring our greenhouse gas emissions down to zero—and sharing stories of people who are making those changes reality. Energy policy advisor Hal Harvey and longtime New York Times reporter Justin Gillis hone in on the seven areas where ambitious but eminently practical changes will have the greatest effect: electricity production, transportation, buildings, industry, urbanization, use of land, and investment in promising new green technologies. In a lively, jargon-free style, the pair illuminate how our political economy really works, revealing who decides everything from what kind of power plants to build to how efficient cars must be before they're allowed on the road to how much insulation a new house requires—and how we can insert ourselves into all these decisions to ensure that the most climate-conscious choices are being made. At once pragmatic and inspiring, The Big Fix is an indispensable action plan for citizens looking to drive our country's greenhouse gas emissions down to zero—and save our climate.
