**Integrating Ecohydraulics in River Restoration** Feb 19 2020 Rivers have been intensively degraded due to increasing anthropogenic impacts from a growing population in a continuously developing world. Accordingly, most rivers suffer from pressures as a result of increasing dam and weir construction, habitat degradation, flow regulation, water pollution/abstraction, and the spread of invasive species. Science-based knowledge regarding solutions to counteract the effects of river degradation, and melding principles of aquatic ecology and engineering hydraulics, is thus urgently needed to guide present and future river restoration actions. This Special Issue gathers a coherent set of studies from different geographic contexts, on fundamental and applied research regarding the integration of ecohydraulics in river restoration, ranging from field studies to laboratory experiments that can be applied to real-world challenges. It contains 13 original papers covering ecohydraulic issues such as river restoration technologies, sustainable hydropower, fish passage designs and operational criteria, and habitat modeling. All papers were reviewed by international experts in ecology, hydraulics, aquatic biology, engineering, geomorphology, and hydrology. The papers herein well represent the wide applicability of ecohydraulics in river restoration and serve as a basis to improve current knowledge and management and to reduce arguments between different interests and opinions.

*Integrated Systems: Innovations and Applications* Jul 26 2020 This book presents the results of discussions and presentation from the latest ISDT event (2014) which was dedicated to the 94th birthday anniversary of Prof. Lotfi A. Zade, father of Fuzzy logic. The book consists of three main chapters, namely: Chapter 1: Integrated Systems Design Chapter 2: Knowledge, Competence and Business Process Management Chapter 3: Integrated Systems Technologies Each article presents novel and scientific research results with respect to the target goal of improving our common understanding of KT integration.

*The Practicing Stoic* Oct 09 2021 "The great insights of the Stoics are spread over a wide range of ancient sources. This book brings them all together for the first time. It systematically presents what the various Stoic philosophers said on every important topic, accompanied by an eloquent commentary that is clear and concise. The result is a set of philosophy lessons for everyone - the most valuable wisdom of ages past made available for our times, and for all time."--Provided by publisher.

High School and Beyond, 1980 Sophomore Cohort First Follow-up (1982) : Data File User's Manual Jun 05 2021

*World Congress on Medical Physics and Biomedical Engineering, June 7-12, 2015, Toronto, Canada* Feb 13 2022 This book presents the proceedings of the IUPESM World Biomedical Engineering and Medical Physics, a tri-annual high-level policy meeting dedicated exclusively to furthering the role of biomedical engineering and medical physics in medicine. The book offers papers about emerging issues related to the development and sustainability of the role and impact of medical physicists and biomedical engineers in medicine and healthcare. It provides a unique and important forum to secure a coordinated, multileveled global response to the need, demand and importance of creating and supporting strong academic and clinical teams of biomedical engineers and medical physicists for the benefit of human health.

**Structural Mechanics Computer Programs** Dec 31 2020

*Microstrip Patch Antennas: A Designer's Guide* Sep 08 2021 This useful tool provides the reader with a current overview of where microstrip patch antenna technology is at, and useful information on how to design this form of radiator for their given application and scenario. Practical design cases are provided for each goal.

**User's Manual to the International Annual Reports Collection** Dec 11 2021

**Modification of the SHABERTH Bearing Code to Incorporate RP-1 and a Discussion of the Traction Model** May 04 2021

Wetland Techniques Oct 17 2019 Wetlands serve many important functions and provide numerous ecological services such as clean water, wildlife habitat, nutrient reduction, and flood control. Wetland science is a relatively young discipline but is a rapidly growing field due to an enhanced understanding of the importance of wetlands and the numerous laws and policies that have been developed to protect these areas. This growth is demonstrated by the creation and growth of the Society of Wetland Scientists which was formed in 1980 and now has a membership of 3,500 people. It is also illustrated by the existence of 2 journals (Wetlands and Wetlands Ecology and Management) devoted entirely to wetlands. To date there has been no practical, comprehensive techniques book centered on wetlands, and written for wetland researchers, students, and managers. This techniques book aims to fill that gap. It is designed to provide an overview of the various methods that have been used or developed by researchers and practitioners to study, monitor, manage, or create wetlands. Including many methods usually found only in the peer-reviewed or gray literature, this 3-volume set fills a major niche for all professionals dealing with wetlands.

UHPCC Under Impact and Blast Nov 29 2020 This book is about the Ultra-high Performance Cementitious Composites (UHPCC), which is a relatively new type of cementitious materials. UHPCC has very low water-to-binder ratio, high amount of high-range water reducer, fine aggregates and high-strength steel or organic fibers. With the prominent mechanical properties, e.g., high compressive and tensile strength, high ductility, and high fracture energy, UHPCC has been becoming the most prospective construction cement-based material for both civil and military structures to resist high-speed projectile penetration, low-velocity impact and blast loadings. In this book, the related work conducted by authors on the static and dynamic mechanical properties, as well as the impact and blast resistance of UHPCC are presented. This book is written for the researchers, engineers and graduate students in the fields of protective structures and terminal ballistics.

*Computer Applications in Resource Estimation* Jan 20 2020 Quantitative resource assessment methods play an increasing role in exploration for petroleum, water and minerals. This volume presents an international review on the state-of-the-art of the computerized methodology in resource exploration. The papers taken from those presented at the symposium are classified to either techniques, i.e., trend analysis; classification techniques; geostatistics; image analysis; expert systems/artificial intelligence; inventories; tomography and others, or to resources, i.e., petroleum, water, metals and non-metals.

**Poultry Genetics, Breeding and Biotechnology** Aug 27 2020

**Geothermal Energy Update** Sep 20 2022

*Engineering Design Reliability Handbook* Mar 14 2022 Researchers in the engineering industry and academia are making important advances on reliability-based design and modeling of uncertainty when data is limited. Non deterministic approaches have enabled industries to save billions by reducing design and warranty costs and by improving quality. Considering the lack of comprehensive and defini

*River Training Techniques* Apr 03 2021 This text covers river training techniques. Divided into two parts, it discusses properties of rivers and fundamentals of river engineering and flood protection.

**Information Systems Development** May 16 2022 Information Systems Development: Reflections, Challenges and New Directions, is the collected proceedings of the 20th International Conference on Information Systems Development held in Edinburgh, Scotland, August 24 - 26, 2011. It follows in the tradition of previous conferences in the series in exploring the connections between industry, research and education. These proceedings represent ongoing reflections within the academic community on established information systems topics and emerging concepts, approaches and ideas. It is hoped that the papers herein contribute towards disseminating research and improving practice

*High School and Beyond* Jul 06 2021

*Practical Aspects of Declarative Languages* Oct 29 2020 This book constitutes the refereed proceedings of the 5th International Symposium on Practical Aspects of Declarative Languages, PADL 2003, held in New Orleans, LA, USA, in January 2003. The 23 revised full papers presented together with 3 invited contributions were carefully reviewed and selected from 57 submissions. All current aspects of declarative programming are addressed.

*National Center For Education Statistics, User's Manual, Schools and Staffing Survey, 1993-94 Schools and Staffing Survey: Data File User's Manual, Vol. 1: Survey Documentation, October 1996* Dec 23 2022

**Recent Advances in Structural Engineering, Volume 1** Nov 17 2019 This book is a collection of select papers presented at the Tenth Structural Engineering Convention 2016 (SEC-2016). It comprises plenary, invited, and contributory papers covering numerous applications from a wide spectrum of areas related to structural engineering. It presents contributions by academics, researchers, and practicing structural engineers addressing analysis and design of concrete and steel structures, computational structural mechanics, new building materials for sustainable construction, mitigation of structures against natural hazards, structural health monitoring, wind and earthquake engineering, vibration control and smart structures, condition assessment and performance evaluation, repair, rehabilitation and retrofit of structures. Also covering advances in construction techniques/ practices, behavior of structures under blast/impact loading, fatigue and fracture, composite materials and structures, and structures for non-conventional energy (wind and solar), it will serve as a valuable resource for researchers, students and practicing engineers alike.

*How to Manage Spelling Successfully* Dec 19 2019 Readers will find this practical and comprehensive guide to spelling invaluable. Day-to-day advice on how to help those with difficulties is underpinned by information on the development of the English language and its spelling rules with explanations of common language problems. Chapters cover: spelling processes teaching and learning phonics individual cognitive and learning styles assessing and monitoring spelling progress teaching strategies and techniques. This is an essential companion for teachers, SENCOs, and dyslexia specialists alike, as well as anyone interested in spelling and language difficulties.

*Rewriting Techniques and Applications* Sep 27 2020 This book constitutes the refereed proceedings of the 11th International Conference on Rewriting Techniques and Applications, RTA 2000, held in Norwich, UK, in July 2000. The 15 revised full papers and three system descriptions presented together with two invited contributions were carefully reviewed and selected from 44 submissions. All current aspects of rewriting are addressed.
