History of the United States Since 1877 Jul 16 2022 The Education of Henry Adams meets On the Road in Making History: A Personal Approach to Modern American History. This unique text takes a personal approach to American history. It gets readers excited about their own roles in making history and empowers them to make changes for the betterment of their country. Making History begins with the important point that while most standard textbooks refer to events that have shaped America, these events didn't happen to America - they happened to individual Americans. It is individuals who give their lives in armed conflicts and lose their homes during financial downturns. With this perspective in mind, students are prepared to read and think differently about post-Civil War history, including industrialization, the Spanish-American War and World Wars, the Depression, the Cold War, the Civil Rights Era, Vietnam, the rise of modern conservatism, and the country's current state of decline. With its non-traditional take on events and their impacts, Making History is a fresh alternative for survey courses in American history and historiography or classes in American civilization.
